

ReadHear™ Mac and PC

## Premier Accessible eReader

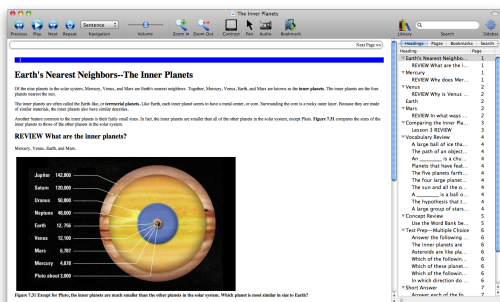

ReadHear™ is the first ever full-featured commercial accessible Digital Talking

Book software player for both Mac and PC on the market! ReadHear is comprised of the latest technology for digital talking books that allows persons with print or learning disabilities the opportunity to read books and documents with ease, save time finding information, benefit from flexible reading solutions, and improve both reading comprehension and productivity.

ReadHear is based on universal design concepts that enhance the reading productivity for persons who are blind, low vision, or mobility-impaired. It also has features to assist individuals with learning disabilities and features to benefit mainstream users.

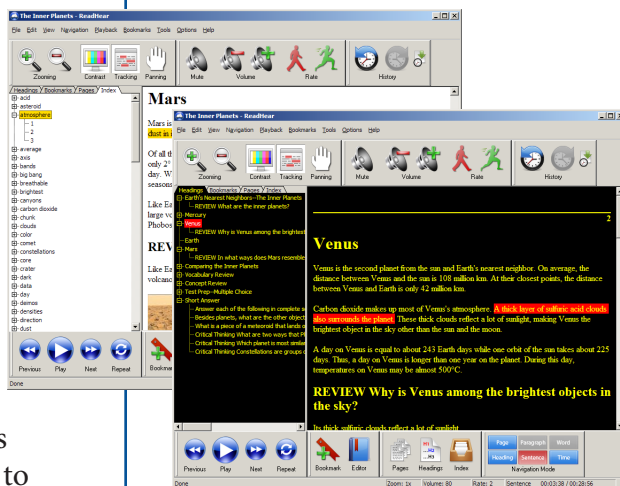

## RFB&D ReadHear by gh

RFB&D ReadHear is now available **free** for qualifying RFB&D members! Enjoy easier access to your favorite titles from the RFB&D Audiobook Library. **Upgrade** discounts are available.

ReadHear™ Mac

ReadHear™ PC

## File Support

ReadHear supports the following formats:

- NIMAS
- Plain text
- DAISY 2 and 3
- Save-As DAISY XML
- MathML
- SVG images\*
- e-Pub\*
- HTML\*
- other e-book formats

\* Feature available on PC only

- **Concurrent licensing now available.** Concurrent licensing is an affordable way to provide access to as many as possible at an affordable rate.

- **Optimized for large books.** From encyclopedias to math and science textbooks, any large book will open quickly, navigating and processing at the speed of a smaller book.

- **Continuous audio playback.** ReadHear can be controlled by the keyboard's multimedia keys while using other programs simultaneously.

- **Automatic update.** ReadHear regularly checks for updates so users will always have the most recent version available.
